SALES PRICE :	<b>\$634.50</b>

### PRODUCT DESCRIPTION

The Javelin is an ingenious cutting solution which offers a standard of straight, square and clean cutting that is impossible to achieve with a craft knife and straight edge. A safe, simple, extreme precision cutter requiring no special skills, the Javelin was specifically designed to cut large format graphics, pop ups, signs, plastic panels and much more. The unique design of the Javelin enables its straightness to be factory adjusted, using laser technology, to meet with today's very high standards for accurate butt joints on sectional panels and pop up systems. The Javelin was specifically designed to cut large format graphics, pop ups, signs, plastic panels and much more. Whether used alone as a moveable cutting bar or in conjunction with the Keencut BIG bench to create a superb cutting table the Javelin is truly in a class of its own. Using the Javelin with the BIG bench could not be easier, just place the cutter bar on the material to be cut, align it with the image registration or crop marks, depress the cutting head and push or pull it along to cut. The BIG bench is recommended to ensure straightness and accuracy. The Javelin cutter bar is fitted with two full length rubber strips on the underside that grip tenaciously to any surface without marking. Factory Laser truing guarantees accuracy to within .008 in. over the full length of the cut. For an even more precise cut add the Lift and Hold Mechanism to your workbench allowing you to turn your existing work surface into a precision cutting station. The lift and hold is recommended for cutters up to 80 inches.

### PRODUCT FEATURES

Ingenious cutting solution providing extremely straight, square and clean cuts impossible by

hand.

Uses standard replacement blades.

Comes with wall-mounted brackets for storing cutters out of the way.
