### PRODUCT DESCRIPTION

Martin Yale Intimus Powerline PL265 Fully Automatic 26 Programmable Paper Cutter with FAIM The Martin Yale PL 265 26 PowerLine automatic electric paper cutter is a programmable electric paper cutter that cuts paper up to 26 3 8 wide and stacks of paper up to 2 7 8 high. The automatic paper clamp mechanism securely holds the paper in place, ready to be cut. A fully programmable back gauge with Auto Advance automatically adjusts paper alignment for this Electric Paper Cutting Machine. The back gauge of this paper cutter also stores up to 5 cutting programs with up to 10 settings each. Removing the clamp plate permits the user to cut carbonless and other delicate papers. For maximum safety, the Martin Yale PL 265 electric paper cutter comes equipped with dual push button cutting control, safety guards and keyed access. Optional side tables available for a larger workspace for the PowerLine PL265 Electric Paper Cutter.

**FEATURES** Automatic paper clamp operation

Pictured with optional side tables PL2T  
Dimensions 39 1 5 x 50 x 49 1 2  
Weight 823 lbs. Shipping Weight 900 lbs. Supply Voltage 220 240V Setup and training available at additional cost. With FAIM you get Installation by a factory authorized installer Application and

use training by a factory installation installer Up to two additional, no charge maintenance calls during the first year by a factory authorized installer Replacement parts free for one year from the date of installation except for consumables such as rubber wheels and rollers; slitting, perforating and scoring wheels; blades, cutting sticks; etc . Why FAIM might make sense for you If you sell consumables, such as paper or forms, you can now sell bursters, decollators, folders and cutters to your customers No need for your organization to develop the servicing skills required to maintain complex machines Allows minimal involvement and frees you to pursue other more profitable or desirable opportunities Even at an installation where an adjustment might be necessary, factory authorized installers are trained to handle that eventuality In the unlikely event a machine does not function to the specifications at installation, Martin Yale will repair or replace the unit. Increased customer satisfaction, as there is less room for operator error an avoidable cause of customer dissatisfaction with equipment. NOTE The FAIM Program will aid in the proper installation, training and operation of our equipment, however, it is no substitute for proper application selling. Martin Yale warrants its equipment will operate within published specifications, however, specific applications cannot be guaranteed. If an end user has a unique application, simply supply Martin Yale with samples. We will test the application before a buying decision is made.
